

# My Visit to the Dentist at KKH

Today I am going to visit the dentist at KK Women's and Children's Hospital (KKH). The dentist keeps my teeth clean and healthy.

When I arrive at the clinic, I register at the counter and get a queue number. I will sit and wait for my turn in the waiting room. There are toys for me to play with.

When my queue number is called, I will go into the room and the dentist will say hello to me.

My dentist will wear a mask, gown, cap and gloves to look at my teeth.

I will need to sit still on a big chair. I will put on cool sunglasses. The big chair will move down backwards.

The dentist will count my teeth with a small mirror and some other small tools.

I will help by opening my mouth wide so the dentist can count the number of teeth I have.

I will get my teeth brushed with a special toothbrush. The toothbrush is soft. The toothpaste tastes like strawberry.

When I am done, I get to pick a sticker for my good work! I am happy and I say goodbye to the dentist.
