For babies born in KKH – search for mother's account using "Find patient" on SCM using mother's NRIC number.

If the baby was not born in KKH and regardless of whether mother is under follow-up in KKH:

1. Inform nurse / ward clerk to Fax mother's IC (front and back) indicate pink / blue IC, Fax no: 8089 (Admission clerk's counter – will create ancillary visit under KXRLTX).
2. Nurse / ward clerk to call admission counter to confirm.
3. Ward Doctor will order "NNJ Mother" or "Type & Screen" in CPOE once account no. created (under KKH relative Inpatient order), generate CPOE labels and collect mother's blood.

EDTA tube (Paediatric). To collect 2 ml (minimum 1 ml) from baby.

EDTA tube (Adult). To collect 9 ml from mother.
